🎓 EDUCATION

Peking University, Beijing, China

Sept. 2024 – Present

M.S. student in Artificial Intelligence, expected June 2027

Jilin University, Changchun, China

Sept. 2020 – July 2024

B.S. in Computer Science and Technology

🔍 RESEARCH INTERESTS

Generalizable robotic manipulation, with a current focus on world action models learned from large-scale human and robot data; broader interests include vision-language-action (VLA) models, visual affordance, and multi-modal policy learning.

</> ONGOING PROJECT

OpenWAM: A Modular Library for World-Action Model Training, Inference and Deployment
2026 – Present

A unified framework for World-Action Models (WAMs) — video-diffusion policies that jointly generate future visual dynamics and robot actions — covering multiple architecture families, training, deployment, and benchmark evaluation; open-source release in preparation.

📄 PUBLICATIONS

(* indicates equal contribution)

LD4WAM: Learning Latent Dynamics from Human Videos for World Action Models 2027

Under review at AAAI 2027

Zhenhao Shen*, **Jiaqi Liang***, Jasper Lu*, Feng Jiang, Yuran Wang, Chuanbo Wei, Jiayi Liu, Jianchun Yang, Qize Yu, Jiadi You, Ce Hao, Guanqi He, Chen Xie, Ruihai Wu

Learning latent dynamics from large-scale human videos to build world action models, enabling scalable co-training with human data for generalizable robot manipulation.

AffordanceVLA: A Vision-Language-Action Model Empowering Action Generation through Affordance-Aware Understanding 2027

Under review at AAAI 2027

Qize Yu*, Jiadi You*, Yuran Wang, **Jiaqi Liang**, Bowen Ping, Yang Tian, Yue Chen, Minghong Cai, Zeying Gong, Ruihai Wu, Yinchuan Li, Junwei Liang, Ying-Cong Chen

Project Page: <https://skywalker-yqz.github.io/AffordanceVLA>

A unified vision-language-action framework that bridges semantic understanding and precise robotic control by introducing structured affordance reasoning (which/where/how to act) as an intermediate representation within a Mixture-of-Transformer architecture.

A3D: Adaptive Affordance Assembly with Dual-Arm Manipulation 2026

AAAI 2026 Oral

Jiaqi Liang*, Yue Chen*, Qize Yu*, Yan Shen, Haipeng Zhang, Hao Dong, Ruihai Wu

Project Page: <https://a3d-11011.github.io>

An adaptive point-level affordance framework that enables dual-arm robots to dynamically select and refine support strategies during long-horizon furniture assembly.

DexGarmentLab: Dexterous Garment Manipulation Environment with Generalizable Policy 2025

NeurIPS 2025 *Spotlight*

Yuran Wang*, Ruihai Wu*, Yue Chen*, Jiarui Wang, **Jiaqi Liang**, Ziyu Zhu, Haoran Geng, Pieter Abbeel, Jitendra Malik, Hao Dong

Project Page: <https://wayrise.github.io/DexGarmentLab>

A large-scale benchmark for dexterous garment manipulation, featuring automated data collection and a hierarchical policy that generalizes across diverse garment types and configurations.

PA3FF: Learning Part-Aware Dense 3D Feature Field for Generalizable Articulated Object Manipulation 2026

ICLR 2026

Yue Chen*, Muqing Jiang*, Ruihai Wu*, Kaifeng Zheng, **Jiaqi Liang**, Chenrui Tie, Haoran Lu, Hao Dong

Project Page: <https://pa3ff.github.io>

A feedforward model that learns part-aware dense 3D feature fields, enabling generalization to unseen articulated objects and supporting downstream manipulation tasks.

GarmentPile++: Affordance-Driven Cluttered Garment Retrieval 2026

ICRA 2026

Mingleyang Li*, Yuran Wang*, Yue Chen, Tianxing Chen, **Jiaqi Liang**, Zishun Shen, Haoran Lu, Ruihai Wu, Hao Dong

Project Page: <https://garmentpile2.github.io>

A vision-language-guided retrieval framework that segments garments, infers grasp affordances, and determines when dual-arm cooperation is required for reliable retrieval from cluttered environments.

RESEARCH EXPERIENCE

PKU-Agibot Lab, Peking University, Beijing, China

Sept. 2024 – Dec. 2025

Student Researcher Advisors: Prof. Hao Dong & Dr. Ruihai Wu

Conducted research on affordance-based robotic manipulation, including dual-arm collaborative assembly, dexterous garment manipulation, and articulated object manipulation, leading to publications at AAIL, NeurIPS, ICLR, and ICRA.

INTERNSHIP

WUJI TECH, Beijing, China

May 2026 – Present

Embodied AI / Robotics Research Intern

Conducting research on World-Action Models (WAMs); deeply involved in the development of **OpenWAM** (see Ongoing Project).

Lightwheel, Beijing, China

Jan. 2026 – May 2026

Embodied AI / Robotics Research Intern

Conducted empirical studies on co-training world action models with human and robot data, focusing on scaling laws of human data and their impact on generalization.

SKILLS

Programming: Python, C, Linux, Git **ML & Simulation:** PyTorch, Isaac Gym / Isaac Sim
